

Insect species

Primary focus on fly species able to develop on a range of organic substrates and agri-manufacturing urban by-products, for example:

Black soldier fly - *Hermetia illucens*

Mean wt 0.2 g/ larva

House fly - *Musca domestica*

Mean wt 0.02 g/ larva

Fera Science Ltd is also exploring research on wider insect species and applications for use in waste reduction and provision of high value products.
